

Côte d'Ivoire

Summary of country engagement at SWA

Priority country : Multi-stakeholder approaches

Côte d'Ivoire joined SWA in 2010. For capacity building, technical and financial support, monitoring of commitments and exchange in the WASH sector, the Government takes part in different international platforms. Under the SWA umbrella, the government and partners work in particular around topics related to mutual accountability and tackling inequalities. The government has strengthened inter-ministry collaboration, evinced most recently by the launch of a 5-year programme combining water resources, water supply and sanitation, in the country's most vulnerable areas.

Commitments by the government

Commitment	Body / Organizations	Target Year	Progress Description	Constituency	Progress
Guarantee access to drinking water through the Water for All Programme to 97% of the population by 2025 and 100% by 2030 in urban and rural areas	Ministère de l'Hydraulique, de l'Assainissement et de la Salubrité and Ministère des Eaux et Forêts	2025		Government	50%
