

Guinea

Summary of country engagement at SWA

Guinea joined SWA in 2017. The country is implementing a National Strategy for the Development of the Public Water Service in Rural and Semi-Rural Areas (PNAEPA) to strengthen the sector. During the SWA High-level Meeting in 2019, Guinea formulated its clear and precise commitments to achieve SDG 6 - establish an operational inter-sectoral coordination mechanism for the sector, develop and implement a support program for communes for the management of service works, and develop and implement a national plan for the end of open defecation
