

# Morocco

## Summary of country engagement at SWA

Morocco joined SWA in 2016. Governance of the water sector in Morocco involves several ministerial departments and public institutions that ensure - each in its own way - fair and sustainable access to basic services, including drinking water supply, liquid sanitation and irrigation. This institutional scheme allows decision-making in a concerted and decentralized way. Regulatory bodies at central level intervene to endorse the decisions taken or to decide, if necessary, on possible disputes.

## Commitments by the government

Commitment	Body / Organizations	Target Year	Progress Description	Constituency	Progress
Improve the rate of sustainable access to drinking water in rural areas, with a view to roll-out.	Ministère de l'Équipement, du Transport, de la Logistique et de l'Eau	2030		Government	Reviewing prog
