## Summary of country engagement at SWA

### Priority country : Multi-stakeholder approaches, Systems & Finance

Haiti joined SWA in 2018. The country has an approved National Plan in 3 of the 7 WASH sub-sectors and active participation in the national coordination for drinking water, sanitation and hygiene. Haiti also has a formal government-led coordination mechanism that includes, coordination of activities in the different WASH sub-sectors which includes all relevant ministries/agencies, donors contributing to sector activities at the national level, and non-governmental stakeholders. Haiti aims to improve access to safe drinking water to prevent waterborne diseases as one of its actions in its Public Health priority sector.
