## Summary of country engagement at SWA

India joined SWA in 2019.

### Commitments by the government

No commitments

### Commitments by partners

Commitment	Body / Organizations	Target Year	Progress Description	Constituency	Progress
------------	----------------------	-------------	----------------------	--------------	----------

Implement sustainable sanitation and wastewater treatment solutions across India, in partnership with governments, businesses and the civil society. The solutions are mainly implemented where the facilities are non-existent, and people don't have access to WaSH. Some examples are bio-toilets in schools, communities, low-income households, and worksites and fecal sludge treatment plants in rural and semi-urban/peri-urban communities. All solutions have resource recovery and circular economy, thereby providing treated water, biosolids and biogas.	Banka BioLoo Limited	2030		Private Sector	Reviewing prog
------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------	----------------------	------	--	----------------	----------------

Banka BioLoo will provide sustainable sanitation facilities, in the form of bioloos or bio-toilets, to 250,000 students, primarily from low-income families - in partnership with larger corporations through their CSR programs.	Banka BioLoo	2022		Private Sector	100%
Equip at least 200 CSOs from 11 states of India with information and analysis on the status of WASH and SDG 6.1 and 6.2 implementation, and facilitate developing CSO engagement strategies in these states and implementation of the same with focus on evidence based advocacy for Leaving No One Behind and menstrual hygiene management.	FANSA India	2021		Civil Society	Reviewing prog

Build capacities of the district level local government and CSO functionaries in one selected district each in four states of India to support and strengthen integration of Leaving No One Behind (LNOB) in implementation of WASH programmes and produce annual report on the same.	FANSA India Chapter	2020		Civil Society	Reviewing prog
By end of 2019 build partnership initiatives between CSOs and local governments in four states of India and demonstrate scalable solutions to ensure access to toilets for the persons with disability and elderly and produce annual learning products on the same.	FANSA India Chapter	2020		Civil Society	Reviewing prog

By end of 2019 create an efficient civil society mechanism (National Working Group) which will be regularly reviewing the WASH developments and SDG 6.1 and 6.2 achievement process in India and provide constructive feedback on the policy and practice including monitoring and progress tracking mechanisms.	FANSA India Chapter	2020		Civil Society	Reviewing prog
