Summary of country engagement at SWA

Priority country : Climate Action

Mexico joined the SWA in 2015. To face the great challenge of integrated water management and specifically that of water supply, Mexico designed the National Water Program (PNH) 2020-2024, which has the following objectives: (1) progressively guarantee human rights to water and sanitation, especially in the most vulnerable population (2) efficiently use water to contribute to the sustainable development of productive sectors, (3) reduce the vulnerability of the population to floods and droughts, with emphasis on indigenous and Afro-Mexican people (4) preserve the integrity of the water cycle, in order to guarantee the hydrological services provided by basins and aquifers, and (5) improve conditions for water governance, in order to strengthen decision making and fight corruption.
